

Group 1 – Sprint 3 Review Report

(Victoria Vavulina, Monami Kirjavainen, Miro Valtonen, Riku Toivanen)

Work Completed in Sprint 3

- Successfully finished the host’s initial event-creation flow, as well as the participant’s availability and preferences input flow during this sprint.
- Achieved reliable data syncing between Firebase and Room for the host’s initial event, enabling participants to view accurate event details.
- Added the Finnish cities dataset to Firebase, synchronized it with Room, and integrated it into the meeting-area selection UI.
- Integrated the date-range picker and time-selection components to support host scheduling.
- Enabled the functionality for copying and sharing the event code and event key.
- Successfully saved all participant availability and preference inputs to Firebase.

☒	MA-66 Sync the Firestore location data into Room on app startup and expose it to the UI through Flow to support offline-first location selecti...	DONE	✓	-	MK	

Obstacles Faced

The obstacle we faced in this sprint was the data type mismatch between Firebase and Room for the date field. The error occurred when fetching date values from Firebase into the Room local database. We resolved the issue by aligning both Firebase and Room to use the same data type for the date.
