

Group 1 – Sprint 6 Planning Report

(Victoria Vavulina, Monami Kirjavainen, Miro Valtonen, Riku Toivanen)

Sprint 6 Goal

Deliver a polished, stable UI with full input validation, improve code quality through automation and refactoring, and achieve comprehensive test coverage across core business logic and key user flows.

Sprint 6 Goals Breakdown

1. **UI Polish** — Consistent design system, outlined inputs with validation feedback across all key screens
2. **Navigation & Host Flow** — Correct routing and complete Fill my Availability button integration
3. **Code Quality** — Automated CI pipeline, ktlint and Detekt enforced on every merge
4. **API Efficiency** — Places API restricted to Finland, reducing cost and irrelevant results
5. **Test Coverage** — Unit tests for core repository logic and UI tests for critical user flows

Planned Tasks

1. Design fixes – button sizes, spacing, layout, font sizes, input background color fix
2. Update Title, Name, and Join Event inputs to use OutlinedTextField style and add validation with error messages
3. Update Home page button navigation destinations
4. Add Fill my Availability button to Host Dashboard UI
5. Connect Fill my Availability button — hide once availability is filled
6. Code refactoring
7. Set up GitHub Actions pipeline to run all tests on every merge
8. Add ktlint and Detekt for lint and static analysis
9. Fix API Data Filtering for Meeting Candidates - Restrict Places API search results to region or country
10. Unit tests - EventRepository - createEvent(Success & Failure)
11. Unit tests - EventRepository - syncCities (Parsing Firestore strings)
12. Unit tests - ParticipantUtils - buildAllAvailableDateTimes, buildDateAvailability
13. Unit tests - EventRepository - aggregateParticipantResponses (All options: Time, Place, Food, Location)
14. Unit tests - EventRepository - aggregateRestaurantVotes (Winner logic, Random Tie-break)
15. Unit tests - EventRepository - submitVote
16. Unit tests - DateUtils
17. Unit tests - RestaurantUtils

18. UI tests - JoinPage - Validation (Empty fields vs. Correct submission)
19. UI tests - EventCreation - Stepper Progress (Correct screens show in order)
20. UI tests - PlaceDetails - Submit Vote & Navigate after Vote

MA Sprint 6 22 Apr – 29 Apr (20 work items)			0	10	0	Start sprint	...
☒	MA-98	Design fixes – button sizes, spacing, layout, font sizes, input background color fix	TO DO	✓			
☒	MA-99	Update Title, Name, and Join Event inputs to use OutlinedTextField style and add validation with error messages	TO DO	✓

☒	MA-112	Unit tests - EventRepository - submitVote	TO DO	✓			
☒	MA-113	Unit tests - DateUtils	TO DO	✓			
☒	MA-114	Unit tests - RestaurantUtils	TO DO	✓			
☒	MA-115	UI tests - JoinPage - Validation (Empty fields vs. Correct submission)	TO DO	✓			
☒	MA-116	UI tests - EventCreation - Stepper Progress (Correct screens show in order)	TO DO	✓			
☒	MA-117	UI tests - PlaceDetails - Submit Vote & Navigate after Vote	TO DO	✓			

Sprint Success Measurement

UI Polish All inputs use OutlinedTextField, error messages show on invalid submission

Navigation All Home page buttons route to correct destinations

Host Flow Fill my Availability button appears and hides correctly

Code Quality CI pipeline passes on every merge, ktlint and Detekt report zero violations

API Efficiency No Places API results outside Finland

Test Coverage All 11 unit tests and 3 UI tests pass in CI
