

User Stories

1. Creating and Joining an Event (Host & Participants)

- **[High] As a host**, I want to create a new event so that my friends and I can find a suitable meeting time and place.
- **[High] As a host**, I want the app to generate an event ID or shareable link so that I can easily invite others without searching for usernames.
- **[High] As a participant**, I want to join an event by opening a link or entering an event code so that I can immediately access the correct event without creating an account.
- **[High] As a participant**, I want to join anonymously through Firebase Authentication so that I can participate quickly without registration.

2. Providing Availability and Preferences

- **[High] As a participant**, I want to enter my available dates so that the app can determine when most people are free.
- **[High] As a participant**, I want to select a preferred area so that the meeting location is convenient for me.
- **[Medium] As a participant**, I want to choose a place type (e.g., restaurant, café) so that the suggestions match the group's preferences.
- **[Medium] As a participant**, I want to optionally enter a keyword (e.g., sushi, vegan) so that the restaurant suggestions better match what I want.

3. Viewing Group Availability and Suggestions

- **[High] As a user**, I want to see which dates have the highest number of available participants so that I can understand the best meeting options.
- **[High] As a user**, I want the app to show all top candidate dates when multiple dates have the same number of available participants so that I can choose between them.
- **[High] As a user**, I want to see the most commonly selected area and place type so that I understand the group's preferences.
- **[High] As a user**, I want to view restaurant suggestions for each candidate date so that I can compare options.

4. Restaurant Recommendations

- **[High] As a user**, I want the app to fetch restaurant options based on the selected area, preferred date, place type, and keyword so that the suggestions match the group's needs.
- **[High] As a user**, I want the app to automatically filter restaurants by rating, popularity, or relevance when there are too many options so that I only see high-quality suggestions.
- **[High] As a user**, I want to see each restaurant's rating, photos, and basic details so that I can evaluate whether it fits our meeting.
- **[High] As a user**, I want to see the distance from my current location to each restaurant so that I know how far I need to travel.

- *[Medium]* As a user, I want to open Google Maps directions directly from the restaurant card so that I can easily check how to get there.

5. Voting and Final Decision

- ***[High]*** As a participant, I want to vote for my preferred restaurant so that the group can decide together.
- ***[High]*** As a user, I want the app to show which restaurant received the most votes so that we can finalize the meeting place.
- ***[High]*** As a user, I want the app to show the final meeting date and location so that everyone knows the plan.

6. Data Storage and Offline Support

- *[High]* As a user, I want my event information to stay synchronized for all participants so that everyone always sees the same updated details.
- *[High]* As a user, I want the app to work even with a weak or unstable internet connection so that I can still view the event information when needed.

7. Location & Permissions

- *[High]* As a user, I want the app to ask for location permission only when necessary so that I understand why my location is being used.
- *[High]* As a user, I want the app to detect my current location so that restaurant suggestions and distance calculations are accurate.

8. Past Meeting Records

- *[Medium]* As a user, I want to access the history of past events so that I can revisit previous meeting details.
- *[Low]* As a user, I want to rate a past meeting with a star score so that I can quickly express how satisfied I was with the event.
- *[Low]* As a user, I want to leave a short written comment about the past meeting so that I can record what went well or what could be improved.
- *[Low]* As a user, I want to upload one or more photos from the meeting so that I can visually remember the event later.
