

Group 1 – Sprint 4 Planning Report

(Victoria Vavulina, Monami Kirjavainen, Miro Valtonen, Riku Toivanen)

Sprint 4 Goals

Create all Participant dashboard UI pages of Host. Get the data of events to Dashboard UI from Firestore.

Planned Tasks

1. Implement remaining Host side dashboard pages

- Build UI for participant dashboard waiting close
- Build UI for participant dashboard choose date and area
- Build UI for date and location selecting page
- Build UI for restaurant list page
- Build UI for restaurant detail page with voting

2. Implement data of participants to Host dashboards (Firebase -> Room).

3. Implement functionality to buttons.

4. Data to retrieve through the Room to the UI pages

- Date & Area, Restaurant List and Restaurant Details pages
- Restaurant Detail page, the distance is calculated using some GPS and the view on Google Maps button goes to Google Maps, so to an external service
- Pressing the Vote for this restaurant button adds that information to firebase again.

Sprint Success Measurement

All 5 UI screens render and are navigable

Participant data syncs from Firebase → Room → UI

All buttons are functional and trigger correct actions

Restaurant detail shows correct GPS distance and opens Google Maps

Voting writes to Firebase and updates the UI
